# SUBJECT INDEX

Ammonia
  quasi-static and high frequency $C(V)$-response of thin Pt metal–oxide–Si structures to, 369
  selective detection of, by semiconducting pellets of Zn and Ge oxynitrides, 133

Blood gas analyser
  prototype miniature, fabricated on Si wafer, 101

Carbon monoxide
  gas sensitivities of reduced perovskite oxide $LaCoO_{3-x}$, 215
  levels in combustion gases, detection of, by thick-film $SnO_2$ sensor, 19
  response of MOS sensors with ultrathin Pd gates to, and methane, 331
Chemical sensor(s)
  polymer-coated ZnO/Si surface-acoustic-wave and Lamb-wave, computer modelling of, 35
CMOS
  integrated Si gas-flow sensor with pulse-modulated output, 293
Color sensor
  four-color discriminating sensor using amorphous Si drift-type photodiode, 69
Combustion gases
  detection of CO levels in, by thick-film $SnO_2$ sensor, 19
Computer modelling
  of polymer-coated ZnO/Si surface-acoustice-wave and Lamb-wave chemical sensors, 35

*N*-Docosyl pyridium
  TCNQ Langmuir–Blodgett films as gas sensors, investigation of, 251
Dual-disc semiconductor
  lean-burn O sensor consisting of, 319

Electret–MOSFET
  integrated, based pressure sensor; PRESSFET, 349
Electric actuators
  design considerations for micromachined, 269
Electrical conductance
  of $SnO_2$, influence of adsorbed hydroxyl species on, 27
Electrical conductivity
  and gas sensitivity of some transition metal tantalates, 79
Electroactive polymers
  in gaseous oxidizing atmospheres, behaviour of, 143
Energy
  temperature dependence of barrier, in porous Sn dioxide, study of, 149
Ethanol
  and methanol vapour sensing, semiconducting carbons for water, 233

Fault analysis
  of MOS integrated circuits, fabrication of integrated microprobing head for, 125

Galactosyltransferase
  detection of, using chemically modified piezoelectric quartz, 387
Gas analyser
  prototype miniature blood, fabricated on Si wafer, 101
Gas sensitivity
  change with time of $SnO_2$ gas sensors, mechanism of, 223
  CO, of reduced perovskite oxide $LaCoO_{3-x}$, 215
  of some transition metal tantalates, electrical conductivity and, 79
Gas sensors
  *N*-docosyl pyridinium, TCNQ Langmuir–Blodgett films as, investigation of, 251
  $SnO_2$, mechanism of gas sensitivity change with time of, 223

© Elsevier Sequoia/Printed in The Netherlands

Gas-flow sensor
CMOS integrated Si, with pulse-modulated output, 293
Gas-sensing characteristics
of Sn oxide whiskers with different morphologies, 205
Gaseous oxidizing atmospheres
behaviour of electroactive polymers in, 143
Germanium
selective detection of ammonia by semiconducting pellets of Zn and Ge oxynitrides, 133

High frequency $C(V)$-response
of thin Pt metal–oxide–Si structures to ammonia, quasi-static and, 369
Hydrogen permeation
through thin film of Pd; influence of surface impurities, 243
Hydrophone systems
PZT–polymer composites for transducers of, 361
Hydroxyl species
influence of adsorbed, on electrical conductance of $SnO_2$, 27

Infrared sensing array
integrated thermal, 191
ISFET
pH-, and integrated pH-pressure sensor with back-side contacts, 165

Lamb-wave chemical sensors
polymer-coated ZnO/Si surface-acoustic-wave and, computer modelling of, 35
Langmuir–Blodgett films
investigation of *N*-docosyl pyridinium, TCNQ, as gas sensors, 251
Lean-burn oxygen sensor
consisting of dual-disc semiconductor, 319
Mg-doped $SrTiO_3$ as, 309
Lipoic acid reduction
microbial sensor based on, 9

Magnesium
-doped $SrTiO_3$ as lean-burn O sensor, 309
Magnetotransistor sensor
optimized parallel-field, 177

Methane
response of MOS sensors with ultra-thin Pd gates to CO and, 331
Methanol
vapour sensing, semiconducting carbons for water, ethanol and, 233
Microbial sensor
based on lipoic acid reduction, 9
Micromachined electric actuators
design considerations for, 269
Microprobing head
for fault analysis of MOS integrated circuits, fabrication of integrated, 125
MOS integrated circuits
fabrication of integrated microprobing head for fault analysis of, 125
MOS sensors
response of, with ultrathin Pd gates to CO and methane, 331
MOSFET
integrated electret–, based pressure sensor; PRESSFET, 349

Oxygen sensor(s), 109
lean-burn, consisting of dual-disc semiconductor, 319
Mg-doped $SrTiO_3$ as lean-burn, 309

Palladium
H permeation through thin film of Pd; influence of surface impurities, 243
response of MOS sensors with ultra-thin Pd gates to CO and methane, 331
Perovskite oxide
CO gas sensitivities of reduced, $LaCoO_{2-x}$, 215
pH-ISFET
and integrated pH-pressure sensor with back-side contacts, 165
pH-pressure sensor
pH-ISFET and integrated, with back-side contacts, 165
Photodiode
amorphous Si drift-type, four-color discriminating sensor using, 69
Piezoelectric quartz
detection of galactosyltransferase using chemically modified, 387
Piezoplastics
characterization of, 1

Platinum
quasi-static and high frequency $C(V)$-response of thin Pt metal–oxide–Si structures to ammonia, 369
Polymer(s)
electroactive, in gaseous oxidizing atmospheres, behaviour of, 143
PZT–, composites for transducers of hydrophone systems, 361
/water interactions using surface acoustic waves, study of, 47
PRESSFET
integrated electret–MOSFET based pressure sensor, 349
Pressure sensor(s)
pH-, pH-ISFET and integrated, with back-side contacts, 165
PRESSFET; integrated electret–MOSFET based, 349
Pulse-modulated output
CMOS integrated Si gas-flow sensor with, 293
PZT–polymer composites
for transducers of hydrophone systems, 361

Quartz
detection of galactosyltransferase using chemically modified piezoelectric, 387
Quasi-static
and high frequency $C(V)$-response of thin Pt metal–oxide–Si structures to ammonia, 369

Semiconducting carbons
for water, ethanol and methanol vapour sensing, 233
Sensing array
integrated thermal infrared, 191
Silicon
amorphous Si drift-type photodiode, four-color discriminating sensor using, 69
CMOS integrated Si gas-flow sensor with pulse-modulated output, 293
polymer-coated ZnO/Si surface-acoustic-wave and Lamb-wave chemical sensors, computer modelling of, 35
prototype miniature blood gas analyser fabricated on Si wafer, 101
quasi-static and high frequency $C(V)$-response of thin Pt metal–oxide–Si structures to ammonia, 369
Strontium
Mg-doped $SrTiO_3$ as lean-burn O sensor, 309
Surface acoustic wave(s)
and Lamb-wave chemical sensors, computer modelling of polymer-coated ZnO/Si, 35
study of polymer/water interactions using, 47
Surface impurities
H permeation through thin film of Pd; influence of, 243

Tactile sensor
impedance tomographic, 93
Tantalates
transition metal, electrical conductivity and gas sensitivity of some, 79
TCNQ
*N*-docosyl pyridinium, Langmuir–Blodgett films as gas sensors, investigation of, 251
Temperature dependence
of barrier energy in porous Sn dioxide, study of, 149
Thermal infrared sensing array
integrated, 191
Thermal vacuum sensor
floating-membrane, 259
Tin dioxide
electrical conductance of, influence of adsorbed hydroxyl species on, 27
gas sensors, mechanism of gas sensitivity change with time of, 223
temperature dependence of barrier energy in porous, study of, 149
thick-film, sensor, detection of CO levels in combustion gases by, 19
Tin oxide whiskers
gas-sensing characteristics of, with different morphologies, 205
Titanium
Mg-doped $SrTiO_3$ as lean-burn O sensor, 309
Tomographic tactile sensor
impedance, 93
Transducers
PZT–polymer composites for, of hydrophone systems, 361
Transition metal
tantalates, electrical conductivity and gas sensitivity of some, 79

Vacuum sensor
floating-membrane thermal, 259

Water
ethanol and methanol vapour sensing, semiconducting carbons for, 233

Zinc
polymer-coated ZnO/Si surface-acoustic-wave and Lamb-wave chemical sensors, computer modelling of, 35

Zinc
selective detection of ammonia by semiconducting pellets of Zn and Ge oxynitrides, 133
